# FABER-CASTELL

since 1761

## Company

Faber-Castell is one of the leading companies for high-quality products for writing, drawing and creative design as well as decorative cosmetic products. With more than two billion pencils and coloured pencils per year and around 8,000 employees, Faber-Castell is the major manufacturer of woodcased pencils.

## Carbon footprint

Faber-Castell is making its contribution to climate protection with the forestry project established in Brazil over three decades ago. According to a TÜV Rheinland® study, the forests managed according to the strict FSC standards absorb more than 900,000 tonnes of CO<sub>2</sub>. In this way, they neutralize the CO<sub>2</sub> emissions of the worldwide production sites.

## From a tree to a pencil

In Brazil, saplings are continually planted out to replace each row of trees felled: a sustainable ecological cycle. Over 300,000 young trees of the type *Pinus caribaea* are planted and raised each year. After 20 to 23 years they are large enough to be harvested as environmentally compatible raw material for black-lead and colour pencils.

## Protecting biodiversity

One third of the company's own forests in Brazil are untouched. Scientists from the local universities monitor and document the continuously increasing biodiversity in the Faber-Castell forests. It is home to around 660 animal and plant species, of which 50 are threatened with extinction elsewhere, such as the puma or the coati.

Further information can be found on our sustainability webpage, <http://www.faber-castell.co.za/corporate/sustainability>

## Metallics

Decorate light, dark or colourful paper or even smooth surfaces such as plastic, foil, porcelain, glass and metal with a premium metallic effect. Metallics are resistant to both smudging and water splashes. Can be made waterproof (not dishwasher safe) by baking in an oven at 160 C for 30 minutes.

The special water-based metallic ink is odourless and does not seep through paper. No pumping or shaking is required; the ink flows evenly through the 1.5mm tip, allowing you to start drawing immediately.

## Albrecht Dürer Artist Watercolour Markers

Highly pigmented, water-based, marker with two tips; soft brush tip for all-over colour and dynamic sketches, stable fibre tip for outlines, detailed drawings and precise lines. Outstanding use as watercolours on watercolour paper, extremely light fast, does not bleed through paper, ideal for painting and expressive drawing. For optimal results water colour paper such as Canson Montval (300g/gsm - fine grained) and Hahnemühle Fine Art Britannia (300g/qm hot pressed) should be used. These watercolour papers consist of cellulose paper and support the water solubility of the ink.

## Pitt Artist Pen

Ink drawings have a very long artistic tradition in many countries. The expressiveness and cover-

ing power of ink, along with its permanence and ability to be combined with many other painting techniques, have ensured that this medium has consistently sparked the interest of artists and graphic designers. Faber-Castell has now brought together all of the advantages of drawing in Indian ink in a modern and uncomplicated disposable pen – the Pitt Artist Pen.

The high-quality brush point will continue to function even when bent, and will not break under these conditions. The light colours are transparent, and thus well suited to varnishing techniques, while the dark colours have good covering qualities. Pitt Artist Pens have unsurpassed light-fastness, and the individual colours are marked with an asterisk-based code.
